**BOWLS LAW:** The second of team A is playing a very straight line and touching the jack consistently. The third of Team B is complaining that those bowls could not be legal as they are running too straight. The second of Team A calls the umpire and tells him that the opposition third is challenging his bowls. The umpire asks the third of Team B if he is challenging the bowls and the third replies that they can't be legal as they are running too straight. What does the umpire do?

Answer: He declares that a challenge has been made during a game and under Law 52.4.3 he disqualifies the third of Team B and awards the game to Team A. Moral of the story: be wary of what you say about other players bowls during a game.
